

OLAYENIKAN MICHAEL

Full-Stack Developer | Frontend Developer | Backend Developer

Lagos, Nigeria | olayenikanmichaelolaniyi@gmail.com | [linkedin.com/in/olayenikan-michael](https://www.linkedin.com/in/olayenikan-michael) | github.com/poundsmichaelscode | olayenikan-michael-software-engineer.vercel.app

Professional Summary

Full-stack software developer with hands-on experience building responsive web applications, RESTful APIs, SaaS dashboards, real-time collaboration platforms, e-commerce systems, and AI-enabled products. Strong MERN stack foundation across JavaScript, TypeScript, React, Next.js, Node.js, Express.js, MongoDB, Prisma, Tailwind CSS, Git, Docker, API integration, authentication, and deployment workflows. Experienced in frontend contracts, landing page delivery, client-side application development, backend collaboration, and production-oriented project building.

Skills

Languages: JavaScript, TypeScript, Python, HTML5, CSS3, SQL

Frontend: React.js, Next.js, Tailwind CSS, Redux Toolkit, Zustand, Vite, Responsive Design, UI/UX Implementation, Landing Pages

Backend: Node.js, Express.js, Django, Django REST Framework, FastAPI, RESTful APIs, JWT Authentication, API Design, Middleware, Server-Side Logic

Databases & ORM: MongoDB, PostgreSQL, MySQL, Prisma, Mongoose, Data Modeling, CRUD Operations

Tools & Practices: Git, GitHub, Docker, Postman, Render, Vercel, Linux, Agile Collaboration, Debugging, Deployment, Environment Variables

Relevant Keywords: Full-Stack Development, MERN Stack, System Design Fundamentals, Microservices Concepts, Unit Testing Concepts, Integration Testing Concepts, Cloud Deployment

Work Experience

Frontend Developer - Nerdeye | Contract, 3 months

- Developed client-side features using Next.js, React.js, TypeScript, Tailwind CSS, and Prisma-backed application workflows.
- Integrated frontend screens with backend APIs, collaborating with backend developers to align request/response structures, authentication flows, and error handling.
- Implemented reusable UI components, responsive layouts, and production-ready user interfaces for modern web application experiences.
- Used Git and collaborative development practices to ship features, review changes, debug integration issues, and improve frontend reliability.

Landing Page Developer - Moedify Agency | Remote

- Built approximately 10 responsive landing pages for real estate, small business, and e-commerce clients using React, modern CSS, and conversion-focused UI patterns.
- Translated client requirements into fast, mobile-friendly pages with clear calls to action, clean visual hierarchy, and maintainable component structure.
- Optimized layouts for performance, accessibility basics, cross-device responsiveness, and business presentation quality.

Frontend Development Contributor - GOA Tech | Frontend Development

- Worked on frontend development tasks across responsive interfaces, reusable components, and client-facing pages.
- Applied JavaScript, React, HTML, CSS, and debugging practices to improve usability and maintain application UI consistency.

Full-Stack Web Development Intern - Pantech Solutions | Internship

- Completed full-stack web development training and project work focused on React.js, frontend implementation, backend integration, and application development workflows.
- Practiced building web application features, consuming APIs, managing project structure, and applying version control with Git/GitHub.

Projects

CollabSpace - Real-Time Team Collaboration Platform

Tech Stack: Next.js, TypeScript, Express.js, MongoDB, Socket.IO, JWT, Docker

- Built a team collaboration MVP with workspace flows, real-time chat, document support, Kanban-style task management, and authentication.
- Implemented MERN-style full-stack architecture with REST APIs, MongoDB data models, Socket.IO events, protected routes, and deployment-ready configuration.
- Configured Docker, Render, and Vercel workflows to support local development and cloud deployment.

Link: github.com/poundsmichaelscode/Collab-space

TradeMind - Smart Trading Journal & Analytics Platform

Tech Stack: Next.js, TypeScript, Express.js, MongoDB, JWT, Chart.js, Docker

- Developed a trading journal SaaS MVP for logging trades, tracking performance, reviewing risk behavior, and analyzing trader decision patterns.
- Built secure authentication, trade CRUD workflows, analytics dashboards, risk/reward tracking, strategy notes, and responsive UI screens.

- Integrated backend APIs with frontend dashboards and prepared deployment workflows for Vercel and Render.

ALAT Defence - SOC Cybersecurity Monitoring Dashboard

Tech Stack: Next.js, TypeScript, Tailwind CSS, shadcn/ui, Redux Toolkit, Recharts, D3.js

- Designed and built a cybersecurity dashboard for SOC-style threat visibility, incident monitoring, vulnerability tracking, and security analytics.
- Implemented dashboard UI components including threat severity panels, live attack map visualization, login activity monitoring, and chart-based reporting.
- Applied responsive design, data visualization, state management, and enterprise-style dashboard patterns.

Habita - Property Listing & Housing Management Platform

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Django REST Framework, PostgreSQL

- Built a real estate listing platform MVP for landlords, tenants, and property managers with property listings, tenant-focused flows, and messaging UI.
- Structured the frontend for SaaS-style responsiveness and backend-ready integration with Django REST Framework and PostgreSQL.

Link: github.com/poundsmichaelscode/Habita

AI Document Assistance - AI-Powered Document Assistant

Tech Stack: FastAPI, React, Tailwind CSS, OpenAI, LangChain, Vector Database Concepts

- Created an AI document assistant concept for uploading documents, extracting content, asking questions, and returning AI-generated answers with source-aware workflows.
- Applied RAG pipeline concepts, API integration, file upload handling, frontend chat UI, and backend service architecture.

The Marke Place - Multi-Vendor E-Commerce Platform

Tech Stack: Next.js, TypeScript, Tailwind CSS, FastAPI, PostgreSQL, Redis, RAG Concepts

- Designed and implemented a marketplace SaaS architecture covering customer storefront, vendor dashboard, admin dashboard, cart/checkout, product moderation, and AI SaaS features.
- Applied scalable full-stack architecture, API design, role-based flows, dashboard design, and deployment-focused project organization.

Education

B.Sc. Computer Science - Adekunle Ajasin University

Computer Science Studies - University of the People

Diploma in Software Engineering - LeapSchool

- Software engineering training with MERN stack foundations including JavaScript, MongoDB, Express.js, React.js, Node.js, and TypeScript concepts.

Certifications and Training

- PLP MERN Stack Training - JavaScript, MongoDB, React.js, Express.js, Node.js, RESTful APIs, database integration, deployment basics
- Meta Front-End Developer Professional Certificate - Coursera - HTML, CSS, JavaScript, React, version control, responsive frontend development
- ALX ProDev Frontend - Frontend engineering, web development foundations, React/Next.js concepts, UI implementation, and project delivery
- ALX ProDev Backend - Backend development with Python, Django, databases, REST APIs, authentication, and backend service design
- Cisco JavaScript Essentials Certificate - JavaScript fundamentals, syntax, control flow, functions, debugging, and programming foundations
- Pantech Solutions Full-Stack Web Development Internship - React.js, frontend development, backend integration, and full-stack project workflows

Additional Training

- Coursera Meta Frontend Course - frontend development, JavaScript, React, HTML, CSS, and version control foundations
- LeapSchool Software Engineering - JavaScript, TypeScript, MongoDB, Express.js, React.js, and full-stack engineering concepts
